

# No Steve – **JUST JOBS**

## Senior Network Engineer (m/f/d)

Our client is part of a worldwide leading and strongly growing group in the operation and construction of data centers. For the **Berlin (Ludwigsfelde area)** we are looking for a **Senior Network Engineer (f/m/d)** with immediate effect:

### Your responsibilities:

- Collaborate to design, build, and support all networks required for Security Management Systems, Building Management Systems, and other needs
- Create, implement, and support standard processes and procedures to support SLA to business partners and customers for network uptime, reliability
- Assist in the specification, ordering, purchasing, asset-tracking, and inventory of network-related equipment/supplies/software
- Maintain the network infrastructure globally, recording issues, creating action plans
- Challenge, report and escalate as necessary to resolve any issues affecting the availability, security or integrity of the network infrastructure
- Work closely with cybersecurity to ensure we are following policies and best practice
- Lead and own large scale projects by creating effective project plans, leverage internal tools (JIRA etc) to provide accurate and timely updates to stakeholders
- Understand and comply with the company's Acceptable Use Policy and other industry-specific professional and ethical standards, if applicable
- Leading large scale network migrations in EMEA
- Drive improvements to processes and procedures

### Your qualification:

- 6+ years of progressive network engineering experience with multi-site global networks supporting highly transactional and highly sensitive data applications
- Demonstratable CCNP/JNCIP/CCIE/JNCIE level or higher experience required
- Skilled at an expert level troubleshooting LANs (layer 2 networks), fault finding and isolation, understanding of technologies such as Spanning Tree, Port channels, Stacking
- Strong experience with layer 3 routing, working with ISP's to resolve issues such as latency and packet loss
- Strong experience with firewalls, polices, vpn's, general concepts etc, understanding of advanced inspection and filtering techniques
- Experience working on network migrations, creating project plans, managing multiple projects and delivering according to deadlines
- Skilled in automation and scripting would be highly desirable
- Participation in an on call rota would be required
- German and English business fluent
- Travel required is expected to be 5% but may increase over time as the business evolves

### Our offer:

- Permanent employment in a crisis-proof and growing company
- Above average salary
- Compatibility of free time, family & job
